

July 2012

CRH own 25% of Mashav Initiative and Development who in turn wholly own Israel's sole cement company Neshar Cement Enterprises.

Neshar cement is being used in the construction of the illegal apartheid wall, settlements and infrastructure of settler only roads, bridges and tunnels.

The International Court of Justice ruled that the Separation barrier and settlements were illegal under international law.

CRH plc, through its investment in Mashav, is deriving profits and therefore benefiting from the occupation of Palestine.

Over 10,000 people have now signed the petition calling on CRH to Stop Cementing Misery in Palestine by divesting from Mashav.

CRH are you listening...?
